

# Share location: Features

## 1. Control camera animation

add controller bit to control zoom. If bit clicked then no camera animation but at map still realtime movable marker object will be shown where camera position fixed according to user gesture.

## 2. Realtime communication

(txt msg | img | video call | voice call)

## 3. Show realtime position's all nearest friends by default and through user demanded custom options also.

## 4. Save GPS positions on local db and sync local data by default publicly. First private implementation then privacy will be added.

## 5. Automated suggestive options to get emergency blood, nearest awesome food restaurant, nearest nice place to visit...etc

## 6. Curious map

Show animated things with values only on map and then user will be more connected to share location.

## 7. Show vehicles realtime location (train | bus | drone | plane)

8. Show travelling summary with awesome captured images

(how much river passed? | historical place passed | friends house passed | )

9. Take all contacts info and show all familiars at realtime... who is where now...
